

Included Components

- | | |
|-------------------------------------|-------------------|
| A. Mounting Packet Z
(Not Shown) | F. Cable Clips |
| B. Canopy | G. Glass Shades |
| C. Cover Plate | H. Cable Grippers |
| D. Suspension Cable | i. Cap |
| E. Power Cable | ii. Body |
| | I. Lightbody |

Required Tools (Not Provided)

1. Philips screw driver
2. Wire cutters/ strippers
3. Measuring tape

Assembly Instructions

Step 1: Remove Cover Plate (C) from Canopy (B) by unscrewing the 4X No. 8-32 Screws. The Cover Plate (C) is attached to the Canopy (B) by two short sections of cable. These "cover plate hangers" are meant to aid install. If the Cover Plate (C) is removed from the hangers (not recommended), be sure to align the Small Holes in the Cover Plate (C) with the Small Holes in the Canopy (B) (see Step 4 illustration). Unscrew Cable Gripper Caps (Hi).

Step 2: Mount Canopy (B) to ceiling using the appropriate Hardware Packet (A) and included instructions. Leave Cover Plate (C) hanging.

HARDWARE PACKET Z: MOUNTS TO BUILDING STRUCTURE

Step 3: Start with a single lightbody (I). Pass the Suspension Cables (D) through the large holes in the Cover Plate (C), then the Caps of the Cable Grippers (Hi). Finally, insert the Suspension Cables (D) into the Cable Gripper Body (Hii). Adjust the height of each cable to achieve the desired lightbody (I) height/angle. Screw the Cable Gripper Cap (Hi) back onto the Cable Gripper Body (Hii). **THE GLASS SHADES SHOULD NOT BE INSTALLED WHILE**

Step 4: Next, pass the Power Cable (E) through the small hole in the Cover Plate (C) and the small hole in the Canopy (B). Keep inserting until the Power Cable (E) is taut and parallel with the adjacent suspension cable. Tie an overhand knot in the Power Cable (E) inside the Canopy (B) just above the cable clearance hole. Cut off excess power cable while leaving ~8" for making electrical connections.

Step 5: Remove the outer sheathing of the Power Cable (E) and twist the outer conductor into a wire. This should be connected to the Black (-) driver lead with a wire nut. Strip the sheathing off the inner conductor. This should be connected to the Red (+) driver lead with a wire nut. Wrap each connection individually with electrical tape to ensure no portion of the conductor is exposed.

Step 6: Repeat steps 3, 4, and 5 for remaining lightbodies (I). Connect each lightbody (I) to a different LED Driver.

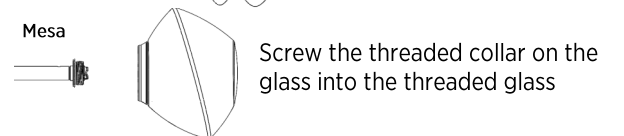

Step 7: Make parallel electrical connections between source power and LED drivers (white and black wire leads) located in the canopy using the provided wire nuts.

Step 8: Re-attach the Cover Plate (C) to the Canopy (B) with No. 8-32 screw.

Step 9: Secure the Suspension Cable (D) to the Power Cable (E) using Cable Clips (F). Adjust the spacing of the clips as desired.

Step 10: Install Glass Shades.

About Hammerton Studio

HAMMERTON STUDIO

When we introduced the Hammerton Studio brand in 2014, we saw an enormous opportunity to raise the bar in decorative lighting. In design, we wanted to lead rather than follow. In construction, we wanted to showcase Hammerton's renowned reverence for time-honored artisan craftsmanship and authentic materials. In performance, we wanted to provide highly reliable solutions that far exceeded industry norms for aesthetics, function, and quality. Based on the brand's dramatic growth and customer feedback, it's clear we are on the right track.

EXTRAORDINARY DESIGN VALUE IN ARTISAN GLASS & METALWORK

Hammerton began in 1995 as a blacksmith shop, but we've come a long way since then. Today we employ a world class team of metal artisans who are disciplined in a broad range of fabrication techniques and processes. We've also added in-house capabilities in blown, cast and kiln-fused glass, and today Hammerton operates one of the largest artisan glass production facilities in the U.S. With deep design and fabrication expertise at the intersection of glass and metalwork, we're laying the foundation for a new era of lighting innovation.

THE HAMMERTON HERITAGE

Our Hammerton Studio brand stands on the shoulders of more than a quarter century of experience pushing the boundaries of innovative custom lighting design. Each Hammerton Studio collection has been inspired by custom work our company has brought to life in collaboration with leading interior design professionals over the years. Built to your specifications, every fixture reflects the uncompromising design and attention to detail that is distinctly Hammerton.

A REPUTATION REFLECTED BY OUR CLIENTS

Hammerton fixtures are as extraordinary as the clients who purchase them, including Forbes 400 members, Fortune 500 leaders, award-winning entertainers, fashion and interior designers, sports legends, and leading luxury hospitality brands.
