

About Hammerton Studio

HAMMERTON STUDIO

In 2013, the Hammerton Studio brand was created to offer artisan-crafted, contemporary design solutions that are both versatile and accessible. Hammerton Studio fixtures add contemporary distinction to entries, great rooms and master suites, yet are cost-effective enough to use throughout any residential or commercial projects. Like all Hammerton fixtures, they are designed and fabricated in Salt Lake City, Utah using domestically sourced materials.

POWERFUL DESIGN

Since 1992, Hammerton has been known for extraordinary decorative lighting that is boldly designed, expertly rendered, perfectly proportioned and exquisitely detailed. Each fixture exudes a design aesthetic that is timeless and enduring, yet remarkably relevant.

UNCOMPROMISING CRAFTSMANSHIP

In addition to their exceptional metalworking and finishing expertise, Hammerton artisans share an aesthetic eye and a sculptural talent that define the difference between ordinary and extraordinary craftsmanship. Every fixture demonstrates its artisan's ability to elevate craft to an art form.

UNIQUE MATERIALS

Our heritage is in metal fabrication, but our passion is design. As a result—and unlike most of our peers—we work in a broad palette of materials: steel and aluminum, blown, kiln-fired and lampworked glass, acrylics, mica, stone, rawhide, woods and much more. Seamless integration of these capabilities is the "secret sauce" that drives our industry leadership as the premier U.S. based custom lighting manufacturer.

A REPUTATION REFLECTED BY OUR CLIENTS

Hammerton fixtures are as extraordinary as the clients who purchase them, including Forbes 400 members, Fortune 500 leaders, award-winning entertainers, fashion and interior designers, sports legends, and leading luxury hospitality brands.

Assembly Instructions SCB0099

Example: SCB0099-03
Cumulus Metal 3 PC Swag Multi-Pendant

WARNING: FAILURE TO INSTALL THIS FIXTURE PROPERLY MAY RESULT IN SERIOUS PERSONAL INJURY OR DEATH AND PROPERTY DAMAGE.

It is recommended that this product be installed by a licensed electrician who is familiar with proper LED installation and electrical loads.

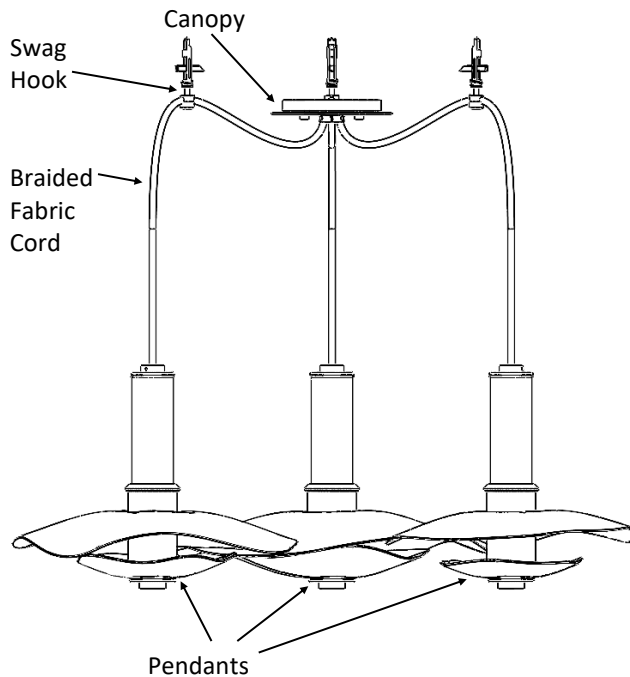

Rev 2
41-001-00319

Included Components

- A. Hardware Packet, with Instructions
- B. Canopy
 - B1. Canopy Faceplate
 - B2. Driver(s)
 - B3. Terminal Block(s)
- C. Pendants
 - C1. Pendant Body
 - C2. Small Glass Spacer
 - C3. Inner Metal Disc
 - C4. Large Glass Spacer
 - C5. Outer Metal or Glass Disc
 - C6. Bottom Motif
- D. Swag Hooks

Required Tools

1. Philips screw driver (not provided)
2. Wire cutters/strippers (not provided)
3. Measuring tape (not provided)

Assembly Instructions

Step 1: Make wire connections from source power to LED driver. **WHITE to WHITE** and **BLACK to BLACK**. Secure driver in J-Box with universal following provided mounting instructions. (Leave **PURPLE** and **BLACK** wires sticking out)

Step 2: Using the E-Z Toggle Kits (see E-Z Toggle Instructions) included in the Hardware pack, install Swag Hooks radially around where the Canopy will be mounted using a measuring tape to achieve the desired distance.

Step 3: Attach each of the pendants to its respective swag hook, adjusting them to their desired height.

Step 4: Hold the Canopy in the approximate location it will be installed. Run the cloth cord of each of the pendants one at a time through the canopy faceplate unit it reached the desired sag between the canopy and the swag hook and tighten the cord grip using a flat blade screw driver. The cord grip is on the Faceplate, **DO NOT OVER TIGHTEN. THIS MAY DAMAGE THE FIXTURE.**

Step 5: cut cords to length and re-strip the end to prepare for wire connections. Be sure to leave at least 6" of length for wire connections.

WARNING

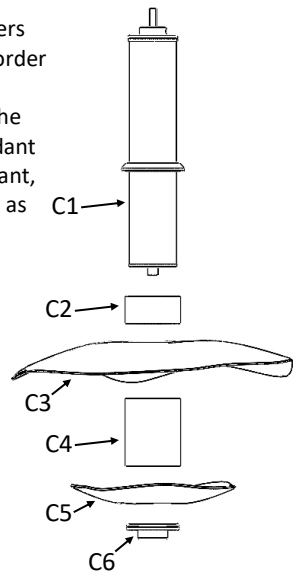

DO NOT DIRECTLY CONNECT LEDs TO AC POWER.

LEDs will be damaged if exposed to high voltages. The LEDs must be wired as described to the included driver to work properly.

Step 6: Connect the **PURPLE** (negative) driver wire to the **BLACK** wires from all of the pendants using wire nuts. Connect the **RED** (positive) driver wire to the **WHITE** wires from all of the pendants using wire nuts.

Step 7: Mount the canopy to the ceiling using the provided **Mounting Instructions**.

Step 8: Assemble the Glass Spacers (C2,C4) and Discs (C3,C5) in the order shown in the image. Secure the Spacers and Discs by threading the Bottom Motif (C6) onto the Pendant Body (C1). Repeat for each pendant, arranging the different Disc sizes as desired

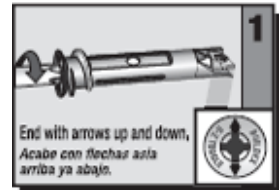

NOTE

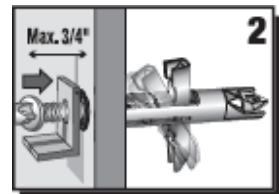

The Inner and Outer Discs will each be marked with a size (SM, MD, LG). Ensure that on a single pendant there is matching Inner and Outer Disc sizes. LG-LG SM-SM etc.

E-Z Toggle™ Instructions

Turn E-Z Toggle into drywall until seated flush. Arrows on head indicate direction toggle clamp will open. End with arrows up and down.

Place fixture over E-Z Toggle. Push screw into E-Z Toggle to engage clamp

Turn screw until it stops. Toggle clamp tightens against drywall as screw is turned.
